

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Feature: User Plus "+" button

Background:

Given that the user is already in the Tally Count App.

Scenario:

Given the default tally value is displayed
When the user clicks on the plus "+" button
Then turn the button green
And then the tally value should be increased by the incremental value
When the tally value reaches the maximum
Then the plus "+" button should be disabled
And then the plus "+" button should be turned into red
But when given the tally value as minimum value
And the minus "-" button has been disabled and turned red
When the plus "+" button is clicked
Then enable the minus "-" button
And then turn the minus "-" button back to the default color

2. User story(ies) in Gherkin syntax for the "-" button.

Feature: User Plus "+" button

Background:

Given that the user is already in the Tally Count App.

Scenario:

Given the default tally value is displayed
When the user clicks on the minus "-" button
Then turn the minus "-" button green
And then the tally value should be decreased by the decremental value
When the tally value reaches the minimum value
Then the minus "-" button should be disabled
And then the minus "-" button should be turned into red
But when given the tally value as maximum value
And the plus "+" button has been disabled and turned red

When the minus “-” button is clicked
Then enable the plus “+” button
And then turn the plus “+” button back to the default color
